Ceeable to be Interviewed at the 2017 HITLAB Innovators Summit

Ceeable has developed and commercialized a digital tele-health technology for ophthalmology

Somerville, Mass., November 28, 2017 – Ceeable, Inc. will be interviewed during the 2017 HITLAB Innovation Summit on November 29, 2017. Ceeable was a winner of the Innovators Summit in 2015. The purpose of the interview is to allow for other entrepreneurs to gain insight into the process of developing and commercializing a digital tele-health technology. The conference takes place at Columbia University in New York City from November 28-30, 2017.

About HITLAB

The 4th Annual [HITLAB Innovators Summit](#) brings together leaders in the life sciences, public health, medicine, technology, and design to discuss health issues and digital solutions in a three-day live event. The Summit offers a series of carefully curated talks, panels, and interactive collaboration opportunities to engage the most creative minds in both health and technology.

About Ceeable

[Ceeable, Inc.](#) is a leader in digital mobile health for ophthalmology. The Ceeable Visual Field Analyzer (CVFA) is a cloud-based digital platform used to detect and diagnose retinal disease. There are more than 300 million people worldwide that suffer from retinal disease. The Ceeable technology can reach more people worldwide than any currently available retinal assessment technology. Better patient management of eye disease will reduce healthcare systems costs and help prevent irreversible vision loss and blindness.
