Ceeable and Dr. Agarwal's Eye Hospitals Receive Financing from Techemerge and IFC for a Digital Health Program

Partnership will enable a digital health visual testing technology for glaucoma, diabetic retinopathy and macular degeneration

Somerville, Mass., November 16, 2016 –Ceeable, Inc. and Dr. Agarwal's Eye Hospitals Group have been selected by [Techemerge](#) and IFC to receive pilot program financing to implement the Ceeable CVFA technology at select hospitals in the Dr. Agarwal's Hospital system. The basis for the pilot program is to demonstrate the clinical utility and efficiency of a digital health ophthalmology solution as compared to traditional test instruments.

"The Techemerge program involved an extensive selection process with over 300 applicants and we are honored to be chosen and partnered with Dr. Agarwal's Hospitals in this joint effort", says Chris Adams, CEO of Ceeable. "The implementation of a digital health solution will enhance our testing efficiencies and bring advanced functional testing to more patients at lower costs", says, Dr. Anosh Agarwal, COO of Dr. Agarwal's Hospitals.

The CVFA can be used in both traditional clinical settings for visual exams and non-traditional settings, from shopping malls to villages. The CVFA is highly mobile and can be accessed from anywhere at any time using a tablet computer and internet connection. This flexibility provides much greater access to patients and caregivers. The Ceeable technology has been used to detect retinal disease on thousands of patients worldwide.

About Ceeable

[Ceeable, Inc.](#) is a leader in digital mobile health for ophthalmology. The Ceeable Visual Field Analyzer (CVFA) is a cloud-based digital platform used to detect and diagnose retinal disease. There are more than 300 million people worldwide that suffer from retinal disease. The Ceeable technology can reach more people worldwide than any currently available retinal diagnostic technology. Better patient management of eye disease will reduce healthcare system costs and help to prevent blindness.

About Dr. Agarwal's Eye Hospital

Dr. Agarwal's Eye Hospitals have been a pioneer in eye care services for almost six decades. With over 60 Hospitals across 14 Countries, Dr. Agarwal's Eye Hospitals are the preferred destination for the eye care needs of millions of individuals across the globe.

About IFC

IFC, a member of the World Bank Group, is the largest global development institution focused on the private sector in emerging markets. IFC has a dedicated venture capital (VC) team that invests in venture/growth technology companies with high impact potential, both local businesses based in emerging markets, as well as increasingly in US/European companies with business solutions relevant for emerging markets.
